

Antivirüs Kurulum Rehberi

1. İlk önce aşağıdaki linkten setup dosyasını indiriyoruz.

İndirme Linki: <https://depo.agu.edu.tr/s/2Tq7FKDxHbpHpES>

The image shows a web browser window displaying a file download page for 'tmsinstall.pkg' (220.3 MB). The page includes a 'Download' button and a 'Discuss this file' section with a 'Join conversation' button. Below the browser window, a file explorer window is open, showing the file 'tmsinstall.pkg' in the 'Downloads' folder. The file explorer window has a table with the following data:

Name	Date Modified	Size
> Resources	Today at 1:41 PM	--
tmsinstall.pkg	Dec 27, 2021 at 6:31 AM	220.3 MB

The file explorer window also shows the path: Macintosh HD > Users > Downloads > tmsinstall.

2. Setup dosyasını indirdikten sonra tıklayıp açtıktan sonra ekrana gelen pencereden allow (izin ver) bölümü tıklanarak setup işlemine başlanır.

3. İşlemler devam ederken aşağıdaki resimde bulunan bölüme bilgisayar açılış şifresi girilerek kurulumu devam edilir.

4. Kurulum işlemi tamamlandıktan sonra karşınıza aşağıdaki gibi bir pencere çıkacaktır. Çıkan pencereden sistem ayarlarına gidip aşağıdaki resimlerde bulunan adımlar uygulanır.

Kilit Simgesine tıkladıktan sonra karşınıza çıkan pencereden bilgisayar açılış şifresini girin. Girdikten sonra aşağıdaki adımları uygulayın.

5. Daha sonra ařağıdaki resimlerde bulunan adımları uygulayarak kurulumu tamamlayın.

Set Up Required Permissions

Apex One (Mac) Security Agent needs System Extension, Full Disk Access, and your permission to load the agent program to provide complete protection for your computer.

Click "Continue" and follow the onscreen instructions to allow Apex One (Mac) Security Agent to open on this computer. It only takes a few minutes.

Continue

Required Permission

- ✓ Certificate
- System Extension
- Full Disk Access

Allow System Extension

Apex One (Mac) Security Agent needs System Extension to protect your files and network activity from malware and security threats.

1.
2. Click the lock icon in the bottom left corner and provide your macOS administrator password to make changes.
3. Click "Details" in Security & Privacy.
4. Select all "iCore Service" in the list, and click "OK".
5. Click "Allow" to allow filter network activity.

Close

Continue

Allow Full Disk Access

Apex One (Mac) Security Agent needs Full Disk Access to protect your application data (for example, Mail, Messages, Safari, etc.).

1.
2. Select "Full Disk Access" from the list of services.
3. Click the lock icon in the bottom left corner and provide your macOS administrator password to make changes.
4.
Locate the "iCore Service" file and drag and drop the file into the Full Disk Access table.
5.
Drag and drop "Apex One (Mac) Security Agent" from the Applications folder into the Full Disk Access table.
6. Make sure the following apps are selected:
 - iCore Service
 - Apex One (Mac) Security Agent
 - Trend Micro Extension

Allow Full Disk Access

Apex One (Mac) Security Agent needs Full Disk Access to protect your application data (for example, Mail, Messages, Safari, etc.).

1.
2. Select "Full Disk Access" from the list of services.
3. Click the lock icon in the bottom left corner and provide your macOS administrator password to make changes.
4.
Locate the "iCore Service" file and drag and drop the file into the Full Disk Access table.
5.
Drag and drop "Apex One (Mac) Security Agent" from the Applications folder into the Full Disk Access table.
6. Make sure the following apps are selected:
 - iCore Service
 - Apex One (Mac) Security Agent
 - Trend Micro Extension

Restart Apex One (Mac) Security Agent to make changes take effect

For permission changes to take effect, click OK to restart the Apex One (Mac) Security Agent program.
